

PP-Configuration for Protection Profile  
for Mobile Device Fundamentals and  
collaborative PP-Module for Biometric  
enrolment and verification - for  
unlocking the device - [CFG-MDF-BIO]

Version 0.99, May 11, 2020

6. Revision History .....	7

# Acknowledgements

This PP-Configuration was developed by the Biometrics Security international Technical Community (BIO-iTC) with representatives from industry, Government agencies, Common Criteria Test Laboratories, and members of academia.

# Chapter 1. Introduction

The purpose of a PP-Configuration is to define a Target of Evaluation (TOE) that combines Protection Profiles (PPs) and PP-Modules for various technology types into a single configuration that can be evaluated as a whole. The scope includes the definition of the configuration of a mobile device (a computer in the terms of the PP-Module) that has biometric enrolment and verification capability. The TOE will be defined by a combination of the components described in [PP-Configuration Components Statement](#).

# Chapter 2. PP-Configuration Reference

This PP-Configuration is identified as follows:

- PP-Configuration for Protection Profile for Mobile Device Fundamentals and collaborative PP-Module for Biometric enrolment and verification - for unlocking the device - version 0.99, May 11, 2020 - [\[CFG-MDF-BIO\]](#)

# Chapter 3. PP-Configuration Components Statement

This PP-Configuration includes the following components:

- Base-PP: Protection Profile for Mobile Device Fundamentals, [\[PP\\_MD\\_V3.3\]](#)
- PP-Module: collaborative PP-Module for Biometric enrolment and verification - for unlocking the device - [\[BIOPP-Module\]](#)

# Chapter 4. Conformance claim and conformance statement

## 4.1. Common Criteria Conformance claim

This PP-Configuration, [PP\_MD\_V3.3] and [BIOPP-Module] are conformant to Common Criteria Version 3.1, Revision 5.

## 4.2. The conformance type

To be conformant to this PP-Configuration, an ST must demonstrate Exact Conformance, as defined by [addenda].

## 4.3. The Assurance package conformance claim

In order to evaluate a TOE that claims conformance to this PP-Configuration, the evaluator shall evaluate the TOE against the following SARs that are defined in the [PP\_MD\_V3.3]:

Table 1. Assurance Components

Assurance Class	Assurance Components
Security Target (ASE)	Conformance Claims (ASE_CCL.1)
	Extended Components Definition (ASE_ECD.1)
	ST Introduction (ASE_INT.1)
	Security Objectives for the Operational Environment (ASE_OBJ.1)
	Stated Security Requirements (ASE_REQ.1)
	Security Problem Definition (ASE_SPD.1)
	TOE Summary Specification (ASE_TSS.1)
Development (ADV)	Basic Functional Specification (ADV_FSP.1)
Guidance Documents (AGD)	Operational User Guidance (AGD_OPE.1)
	Preparative Procedures (AGD_PRE.1)
Life Cycle Support (ALC)	Labeling of the TOE (ALC_CMC.1)
	TOE CM Coverage (ALC_CMS.1)
	Timely Security Updates (ALC_TSU_EXT)
Tests (ATE)	Independent testing - conformance (ATE_IND.1)
Vulnerability Assessment (AVA)	Vulnerability Survey (AVA_VAN.1)

Note that to fully evaluate the TOE, these SARs shall be applied to the entire TSF and not just the portions described by [PP\_MD\_V3.3] where the SARs are defined.
